MDF MOULDINGS

MDF moulding is a versatile trim material used in construction and interior design projects. Made from compressed wood fibers, it offers a smooth surface and uniform density.

USES OF THE PRODUCTS

Masisa MDF moulding finds widespread application as baseboards, crown moulding, door and window casings, chair rails, wainscoting, picture rails, panel moulding, decorative accents, shelving, cabinetry and ceiling beams. It adds a finished look, architectural detail, and decorative accents to walls, ceilings, doors, and furniture. With its ability to be easily painted and customized, MDF moulding provides a solution for enhancing the aesthetic appeal of any space.
